Restaurant POS
redefined

Overview

Everyware builds all-in-one, full-featured, cloud-based point-of-sale platform that powers successful restaurants of all shapes and sizes, types and styles, to manage their hustle and bustle with ease, flexibility and accuracy.

We provide a scalable and reliable solution that combines point-of-sale and customer facing technology to enable restaurants of all kinds to turn more tables with speed, mobility and control and to make the right decision with the right data anytime anywhere.

Market Position

Developed by Everyware, Caterlord is Hong Kong's inaugural real-cloud point-of-sale system running 100% on cloud asking 0 investment in server. Most widely used and readily proven, Caterlord is the heart and soul of over 3500 F&B operations across Hong Kong, Australia and Taiwan.

Products and Services

Everyware is Operation-first, period. We design our platform to simplify and streamline restaurant operations. Our primary goal is to create a smooth and seamless, consistent and convenient experience for our customers.

Our platform offers advanced functionality including tableside (handheld or tablet) and kiosk ordering, quick menu modifications, real-time enterprise reporting and analytics, kitchen display system, customers' own device ordering and/or payment on an easy-to-use interface that integrates with social media.
